XML ECG File Name Creator Program
(available in English only)
Click on a blue button to select a file

This software is provided as-is, without any express or implied warranty. In no event shall Philips Medical Systems be held liable for any damages arising from the use of this software.

The **XML ECG File Name Creator Program** is used to rename **ECG XML** files so that they are easily identifiable. Using this program, the **ECG** file name includes the patient name. patient **ID** information, and the date and time that the **ECG** was taken. This application can also be used to reduce the overall size of the **XML** file by changing the character encoding from **UTF-16** to **UTF-8**, reducing the **XML** file size by half. This program cannot be used with languages that require full **UTF-16** encoding.

The **XML ECG File Name Creator Program** operates with Microsoft **XML Core Services (MSXML 4.0 library)** version 4.0 or higher. Click the button below for more information.
